

## Review of our Performance

During the process of making the website and a variety of multimedia tasks to fit into this, as a team we worked really well in the short space of time we had to do the project in. We found out we had just over a week to complete the project including making a website and videos of our choice, explaining our choice for the sport we've chosen and our ideas for the future.

As a team we all had our own individual contributions to the group to make the project as successful as we could and with two members being sporting experts and four being ICT experts we had all the skills we needed for this project. We were all assigned our own roles based on the skills we had which made the project really successful in so little time.

We also all contributed well as a team as everyone attended meetings and provided contributions which made the project easier and better to do.

We found some problems along the way; not any within team discussions' or in the team itself because we all worked really as a group though we had some problems with the technical side as some of the multimedia wouldn't work on the website because of access rights; in the end everything worked really well as a whole.

If we had to do this again then we would strongly consider the amount of time spent on each part of the project to make sure that everything was on task at the right time.

We would also like to thank Miss Boddy for all the time she's spared to help us with the project and for the opportunity she's given us.
