

Systems Software and Applications Packages

You are to do some research to find out about the following types of software:

- Operating Systems
- User Interfaces
- Utilities
- Translation
- Application
- Programming Languages

1. What is the main purpose of the software?
2. How easy is it to make user defined changes?
3. Who would be the main users of the software?

(Hint: Teach-ICT has some excellent resources for this topic)
