

# Data Entry Form

I chose a yellow background because it is a clear colour for writing to appear on.

I chose this text because it is easy to read and is on a bold text.

The screenshot shows a Microsoft Access window with a form titled "Fruity Facts". The form has a yellow background and contains the following elements:

- Fruit:** A text box containing "Apple (Green)". To its left is a cartoon image of two oranges.
- Sugar (g):** A text box containing "10". To its right is a cartoon image of a bowl of fruit.
- Vit C:** A text box containing "MED".
- Colour Group:** A text box containing "G".
- Calories:** A text box containing "49".

At the bottom of the form, there are three cartoon images: a kiwi fruit, a bunch of purple grapes, and two strawberries. The Microsoft Access interface includes a menu bar (File, Edit, View, Insert, Format, Records, Tools, Window, Help), a toolbar, and a status bar at the bottom showing "Record: 1 of 74".

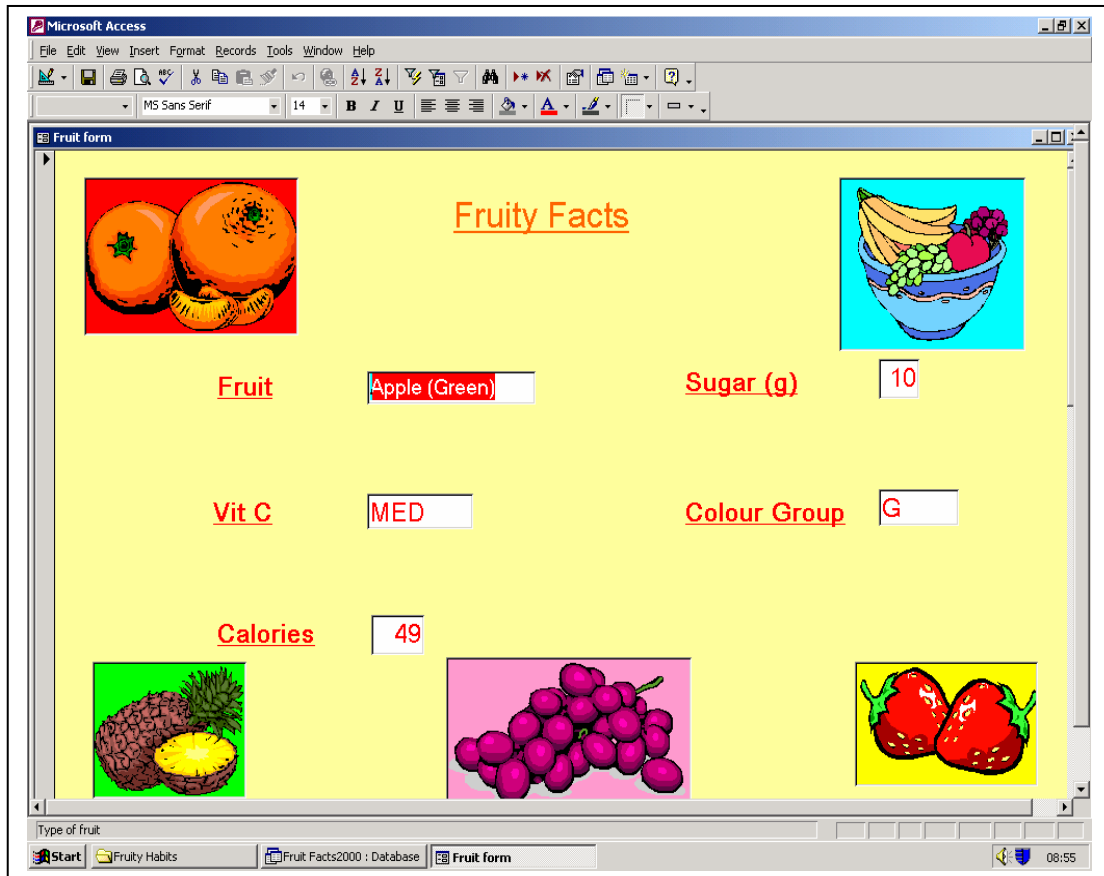

I put all of the boxes in line so it looks neater.

I have changed the font colour to pink and i think that it looks much better know.

I made this box smaller because the numbers only take up a little bit of space.

I had to have cartoon pictures because i was unable to use the internet.

**Jade Jarvis reviewed this sheet on 19th February on how Rebecca did on her work**

**Layout :** I think the pictures are a nice layout but maybe they could be different sizes and maybe a different kind of pictures because they r all cartoon like some real life pitchers might be good

**Pictures:** I think that the pictures should be a different size and real life but otherwise it is good

The background is a nice yellow but the words doesn't go with the yellow I think u should change put maybe a pink

The style of the written is ok may be it could be different style I like the way of the everything else is also done very well
