My Query Red fruit

From my survey results I can see that I do not eat enough of red fruit. I did a search to find what is around for me to eat with this colour fruit.

To find the red fruit I put R in the criteria.

The screenshot shows the Microsoft Access interface with the query results displayed in a table view. The table has two columns: 'Fruit' and 'Colour Group'. The results are as follows:

| Fruit | Colour Group |
|---------------------|--------------|
| Apple (red) | R |
| Cherries, (red) | R |
| Cranberries | R |
| Cranberries, dried | R |
| Cranberry Juice | R |
| Dragon fruit | R |
| Grapefruit (red) | R |
| Grapefruit, (pink) | R |
| Grapes (red) | R |
| Loganberries | R |
| Melon, (water) | R |
| Oranges, Blood | R |
| Pepper, red | R |
| Pomegranate | R |
| Rasberries | R |
| Rhubarb | R |
| Strawberry | R |
| Tomato | R |
| Tomato Juice | R |
| Tomatoes, sun-dried | R |

An arrow points from the text box below to the first row of the table.

These are the red fruits that I could eat.

My Report Red Fruit

| <u>Fruit</u> | <u>Colour Group</u> |
|--------------------|---------------------|
| Apple (red) | R |
| Cherries (red) | R |
| Cranberries | R |
| Cranberries, dried | R |
| Cranberry Juice | R |
| Dragon Fruit | R |
| Grapefruit (red) | R |
| Grapefruit, (pink) | R |
| Grapes (red) | R |
| Loganberries | R |
| Melon (water) | R |
| Oranges, Blood | R |
| Pepper, red | R |
| Pomegranate | R |
| Raspberries | R |
| Rhubarb | R |
| Strawberry | R |
| Tomato | R |
| Tomato Juice | R |
| Tomatoes, sundried | R |

This is a report on the different red fruits that I could eat. I changed the font, and the colour of it. Also the background colour so I can see the writing more clearly.
