

Making a logo for the recipe card holder

Step 1

The first thing i did was search for my image on google which was a kiwi, and i found these images on www.bbcgoodfood.com/.../kiwi-fruit/image.jpg .

Step 2

The next thing i done was search for a picture of a spoon on google and i found it on www.barsupplies.com .

Step 3

The next thing i done was i went on Paint and pasted both images onto there. Then I cropped the picture of the spoon to remove some of the white, and then I positioned it over the top of the kewi to make it look like there was a bit cut out of the kiwi.

Step 4

The final thing i done was go on word art and write Fruity Recipes across the logo .
