

Project log.

Planning	
What users have said about my work	My plan is clearly layed out and shows all information about what I need to do.
Things that have taken longer than expected	It took a long time to make my plan. It took the longest out of all my work.
Things that have gone well	My research for different charities went quite well.
Why I have made a change to your work	I made a working plan which was a copy of my original plan which I used as a log to write about everything I had done and dates when I had done them.
Logo	
What test users have said about my work	They like the shape & effects.
Things that have taken longer than expected	Choosing which effects and colours to use took a lot of time.
Things that have gone well	I think the outcome of my logo is quite good, and I like the look of the effects and shape
Why I have made a change to my work	I first made a logo on word then I changed it to fireworks to make it look better.
Eportfolio	
What test users have said about my work	My test buddy thinks it is eye-catching. She said it was good.
Things that have taken longer than expected	Writing the descriptions of what we had done took longer than I thought it would.
Things that have gone well	The links on my eportfolio have gone well. They are all in the right places and all work correctly.
Why I have made changes to my work	I used spell check to change my spelling errors
Gathering information (sources table)	
What test users have said about my work	It shows all information needed about the sources I have used in my work.
Things that have taken longer than expected	Writing where the source was found took longer than expected because I had to look through all my work to see which picture was where.
Things that have gone well	The table is easy to read and understand.
Why I have made changes to my work	As I completed different sections of my work

	I added the pictures which I had used in the documents.
Creating Database	
What test users have said about my work	She thought it was good and the validations were done well.
Things that have taken longer than expected	The validations took quite along time to enter.
Things that have gone well	Importing the data went very well. I had no problems with my database.
Why I have made changes to my work	My test buddy tested all my validation rules by entering data... I then changed it accordingly.
Data entry form	
What test users have said about my work	My test buddy thinks my layout was good and effective. She also thought the buttons were good.
Things that have taken longer than expected	I think editing all the boxes where you insert data took quite a long time. I thought they would be done quickly but they took longer than expected.
Things that have gone well	I think the buttons have gone really well. They all work and I think the layout of them looks quite good.
Why I have made changes to my work	I added a shadow to the background of my boxes. I also changed the colour of the font to match the rest for the colour scheme.
Dance o'meter quiz	
What test users have said about my work	My test buddy thinks that my layout and questions are good. The questions are simple and to the point.
Things that have taken longer than expected	I think it took longer to make the whole quiz than I expected. I thought it would be really quick but it took quite a long time.
Things that have gone well	I think the drop down boxes and quiz layout have gone well.
Why I have made changes to my work	I added sheet protection to my work so things could not be edited or deleted.
Invitation	
What test users have said about my work	My test buddy has said that the information on my invitation is good because it is short and to the point. She also said the layout is good because it makes it easy to read.
Things that have taken longer than expected	Adding the information took quite a while. It was quite hard what to think what to right.
Things that have gone well	I think the layout of the invitation has worked well. It is easy to read and understand, but it still gives the relevant

	information.
Why I have made changes to my work	I edited the amount of information I had on the invitation. I narrowed it down and added some different stuff which was more relevant.
On screen publication	
What test users have said about my work	Users have told me that the layout of my slides look very good. Also the timings and effects give just the right amount of time for the slide to be read but not too long so the slide is up for ages.
Things that have taken longer than expected	I think adding the timings and effects took longer than I thought.
Things that have gone well	I think the timings and effects went well. They give the right amount of time for the slides to be read and they work well on screen. I think the information works well too. I haven't added too much.
Why I have made changes to my work	I made key words in the presentation different colours and bold. I also added pictures and clipart to make the presentation look more 'fun'. I lastly added a border to my picture on the 1st slide.
Play lists	
What test users have said about my work	My test buddy told me I needed to add certain information to my play lists such as name, charities chosen and time slots. She also thought if I changed my layout to landscape it would look better. She liked the colours I had used and said I have given all the relevant information about the songs.
Things that have taken longer than expected	Editing the play list took quite along while. I had to figure out that I had to add labels instead of text boxes so that took some time to complete.
Things that have gone well	I think the out come of my play lists are quite good. The formula to work out the play time has worked well and gives the correct time. My search filters which I used to search for songs also worked well and gave me the correct results.
Why I have made changes to my work	I changed the look of my play list by changing the page setup to landscape and by adding some extra relevant information. I added the name of the dancer, the charity which had been chosen and a time slot in which the play list will be played.
Sponsor form	

<p>What test users have said about my work</p>	<p>In my evaluation I was told that the colours I used on my sponsor form are good because they suit boys and girls. I was also told that the layout of my form looks very professional and the picture in the background is effective and stands out. I also got told I should add an example to my form and change certain words to a different colour.</p>
<p>What things took longer than expected</p>	<p>I didn't think anything took longer than I expected. The form took 2 lessons to produce and the evaluating, improving and annotation was finished very quickly.</p>
<p>Things that have gone well</p>	<p>I think the outcome of the form is quite good. It looks quite professional and I am happy with the overall outcome.</p>
<p>Why I have made changes to my work</p>	<p>I changed my work according to what me and my testbuddy thought I should change. I added an example to the form in the sponsoring area and I then changed certain words to a different colour to bring attention to them. I also changed the colour and border of the table on my form to make it look more effective and eye-catching.</p>
