

Sponsor form evaluation

Self evaluation.

Advantages	Disadvantages	Area for improvement
Layout: I think the layout for my sponsor form is good because it is clear and easy to read.	Example: I think I should have an example on the top row of the form.	Example: Add and example so people know what to do.
Picture: I think the picture in the background of the form looks quite good. It is a way of advertising the event and is relevant to what the event is.	Key words: I could possibly make keywords a different colour on my form.	Key words: change the key words to a different colour.
Sponsors: I think I have given enough room for people to write their sponsors in.		

Testbuddies evaluation.

Advantages	Disadvantages	Area for improvement
Colour: The colour at the top of the sponsor form makes it stand out and interesting and it appeals to both boys and girls.	Example: I think that Jess could put in an example to show the dancer and their sponsors how to fill in the table.	Example: Jess could put a example on her form.
Picture: I think the picture in the background is effective. The picture makes the form stand out more and get peoples attention.	Table: I think the table is a bit small for people to write in.	Table: Jess could make the table bigger so they have more room to write in.
Layout: The layout is simple and easy to read. And all the information is there.
