

# Evaluation

## Self evaluation

<b>Strengths</b>	<b>Weaknesses</b>	<b>Areas for development</b>
<b>Timmings &amp; effects – I think the effects look quite good. The timmings give enough time for the user to read the publication without having to rush.</b>	<b>Colours – I like the colours that I have used in my publication but I think some people would find them a bit girly.</b>	<b>Add pictures to the last 2 pages. This will make it look more interesting and attractive to the younger generation watching the publication.</b>
<b>Layout – I think the layout is really clear. This makes it easy for the user to read and understand.</b>		

## Test buddy evaluation.

<b>Strengths</b>	<b>Weaknesses</b>	<b>Areas for development</b>
<b>The layout of each slide is very effective. The background colours you have used are eye-catching and will appeal to children.</b>		<b>You could make key words stand out by making them a different colour &amp; larger font size?</b>
<b>The information you have provided is suitable for both adults (as it is very informative) and children (the language is easily accessible).</b>		<b>You could add some “fun”, dance or music related ClipArt pictures to the slides to appeal to children.</b>
<b>The autoshapes you have used look fantastic! I like the way you have used a rounded rectangle and a dotted rectangle together 😊</b>		<b>You could add a border around your photo on the first slide.</b>
