

Creating A Playlist for me

My results from the Dance O meter
 Music Choice: RP & AT
 Fitness Code:Medium

After that, I used these results to search for tracks which matched using a query.

Field:	Title	Genre	Artist	Length(Seconds)	Effort Rating
Table:	Table1	Table1	Table1	Table1	Table1
Sort:					
Show:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Criteria:		"At"			M
or:					

In criteria I put in AT as my genre and M as my effort rating code. Then, by just changing the view back to datasheet.

This are the results that have been produced.

Title	Genre	Artist	Length(Seconds)	Effort Rating
Hide and Seek	AT	Imogen Heap	268	M
Baker Street	AT	Foo Fighters	337	M
Welcome To The	AT	My Chemical Romance	308	M
Yeh Duniya	AT	Ajay	215	M
Star Girl	AT	McFly	207	M
Little Ghost	AT	The White Stripes	138	M
All Of Your Love	AT	Hellogoodbye	176	M
Constant Static	AT	New Found Glory	198	M
Blue Orchid	AT	The White Stripes	158	M
Up in Arms	AT	Foo Fighters	136	M
Hush Boy	AT	Basement Jaxx	239	M
Nach De	AT	Ajay	202	M

I then created a report to display my songs and I also created a box entitled playtime. This is the formula I have used to create it so that the playtime in minutes is displayed.

=Sum([Length(Seconds)])/60

Because my playtime was more than 15 minutes, I had to go back to the query sheet and limit the length of the song.

Playtime: 43.0333333333333

<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
"At"	<200	"M"

The report then calculated these songs with a second count of less than 2 hundred.

This is an image of my final report showing a total playtime of 13.4 minutes.

Finally, I used a variety of tools, effects, colours and tool buttons to create a much better, more attractive, appealing and effective. The picture below is my final report before it has been evaluated and improved.
