

# Evaluation of Quiz

The two tables below show my evaluation of my quiz, and it also includes a column of things that can be improved.

## My Evaluation

| Strengths of Spreadsheet                         | Areas for Development  |
|--|--|
| I have used my house font                        | I could add a back ground  |
| I have included my logo                          | The shading on the fitness rating doesn't look very professional |
| I have included drop down boxes                  | I've only used two colours                                       |
| I have used nested IF statements                 | Some of the font is quite small                                  |
| I've used wordart                                |  |
| I have used conditional formatting               |  |
| I've made some words bold to make it look better |  |

## Test Buddy Evaluation

| Strengths of Spreadsheet           | Areas for Development                            |
|------------------------------------|--|
| Clear writing, easy to understand  | Give it a background colour for even more style! |
| protected cells                    | some answers don't apply to everyone             |
| Nested if statements               | need more room for name boxes                    |
| used wordart to make it look nicer | have to scroll down to do it all.                |
| relevant pictures                  |  |
| colourful                          |  |
|                                    |  |
|                                    |  |
|                                    |  |
