

Test buddy evaluation

I tested the e-portfolio by clicking on all the hyperlinks checking that they are all working, to see if they are connected to the right page and also checking the right information is in each page.

I have checked that all the links work

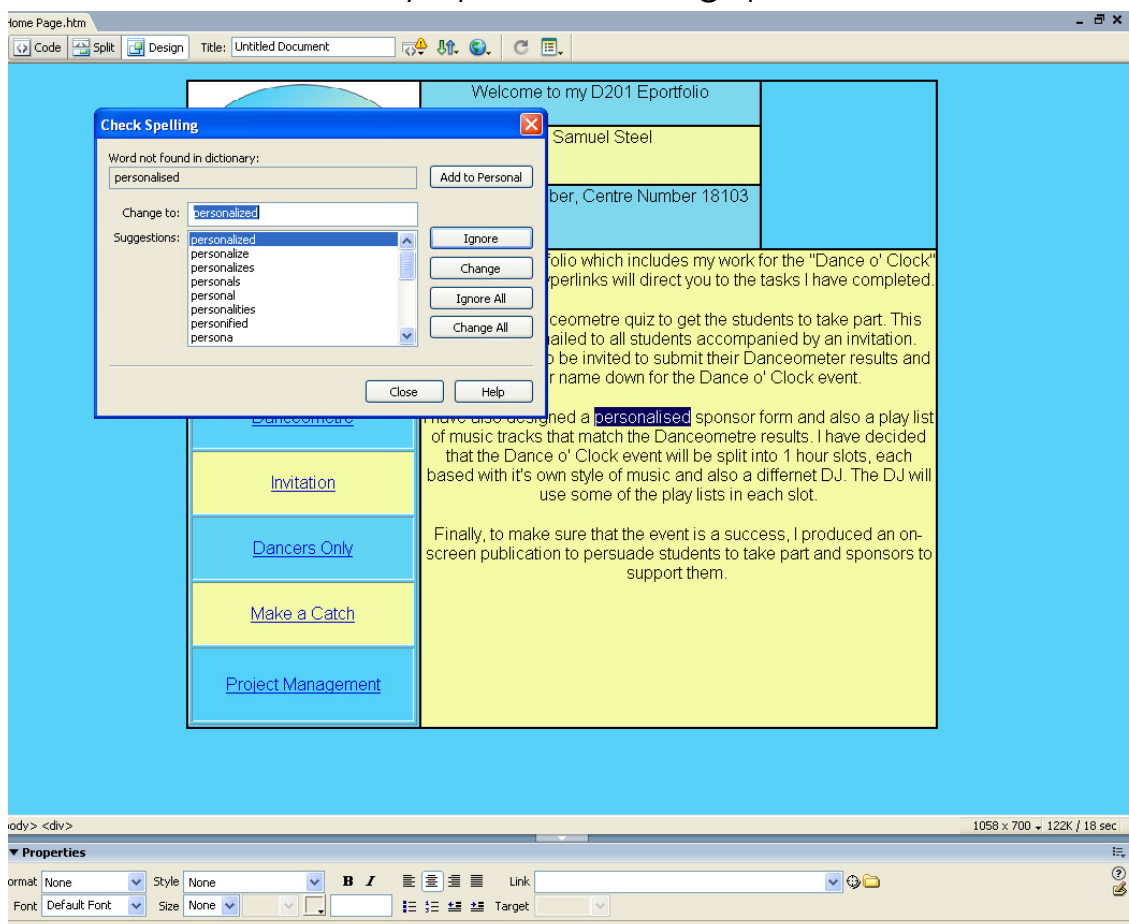

I have checked if there were any typing errors or spelling mistakes; there were none.

I like that each hyperlink has lots of space, the colours and how they are used in the e-portfolio. I like how the colours aren't specifically for girls or boys.

I think that the logo could have a back ground colour instead of white; also the text in each page could be larger to make it more readable.

Self Evaluation

To prove that I have checked my eportfolio, I am including an image which show my eportfolio being spell checked.

As you can see, I have evidence to show that I have spell checked my work.

Test Buddy Evaluation

Strengths	Areas for Development
He has used his house font	He could add some clipart to make it look more attractive
He has included his logo on all the pages	He should include more alternative colours in his colour scheme.
His pages are all linked	He could use a more appealing border.
He has used a colour scheme	
He has included all relevant information and has constructed his eportfolio to have a good structure.
